

CLAIM AMENDMENTS

Claim Amendment Summary

Claims pending

- At time of the Action: Claims 1-14.
- After this Response: Claims 1-14.

Canceled or Withdrawn claims: none.

Amended claims: 3-5 and 8.

New claims: none.

Claims:

1. (previously amended) A multiple-original-output ("Mopying") control system for use with a Mopy-enabled multifunction device (MFD), the system comprising:

a source-selection determiner configured to determine a source selected for a Mopy in a Mopy job from multiple sources on the MFD

a destination-selection determiner configured to determine a destination selected for a Mopy in a Mopy job from multiple destinations on the MFD;

a Mopy-job formatter configured to format a Mopy job that includes source-selecting directions for at least one Mopy in the job and destination-selecting directions for at least one Mopy in the job;

1 a Mopy-job transmitter configured to transmit the Mopy job to the
2 MFD.

3
4 2. (previously amended) A Mopy-enabled multifunction
5 device (MFD) comprising:

6 a printing engine;

7 multiple sources;

8 multiple destinations;

9 a receiver configured to receive a Mopy job from multiple-original-
10 output ("Mopying") control system for use with the MFD, the system
11 comprising:

12 a source-selection determiner configured to determine a source
13 selected for a Mopy in a Mopy job from multiple sources on the MFD;

14 a destination-selection determiner configured to determine a
15 destination selected for a Mopy in a Mopy from multiple destinations on
16 the MFD;

17 a Mopy-job formatter configured to format a Mopy job that
18 includes source-selecting directions for at least one Mopy in the job and
19 destination-selecting directions for at least one Mopy in the job;

20 a Mopy-job transmitter configured to transmit the Mopy job to
21 the MFD.

1 3. (PRESENTLY AMENDED) A printer driver comprising a
2 multiple-original-output ("Mopying") control system for use with ~~the MFD~~ a
3 Mopy-enabled multifunction device (MFD), the system comprising:

4 a source-selection determiner configured to determine a source
5 selected for a Mopy in a Mopy job from multiple sources on the MFD;

6 a destination-selection determiner configured to determine a
7 destination selected for a Mopy in a Mopy from multiple destinations on
8 the MFD;

9 a Mopy-job formatter configured to format a Mopy job that
10 includes source-selecting directions for at least one Mopy in the job and
11 destination-selecting directions for at least one Mopy in the job;

12 a Mopy-job transmitter configured to transmit the Mopy job to
13 the MFD..
14

15 4. (PRESENTLY AMENDED) An application comprising a
16 multiple-original-output ("Mopying") control system for use with ~~the MFD~~ a
17 Mopy-enabled multifunction device (MFD), the system comprising:

18 a source-selection determiner configured to determine a source
19 selected for a Mopy in a Mopy job from multiple sources on the MFD;

20 a destination-selection determiner configured to determine a
21 destination selected for a Mopy in a Mopy from multiple destinations on
22 the MFD;

23 a Mopy-job formatter configured to format a Mopy job that
24 includes source-selecting directions for at least one Mopy in the job and
25 destination-selecting directions for at least one Mopy in the job;

 a Mopy-job transmitter configured to transmit the Mopy job to
the MFD..

1
2 5. (PRESENTLY AMENDED) An operating system
3 comprising a multiple-original-output ("Mopying") control system for use with
4 ~~the MFD~~ a Mopy-enabled multifunction device (MFD), the system comprising:

5 a source-selection determiner configured to determine a source
6 selected for a Mopy in a Mopy job from multiple sources on the MFD;

7 a destination-selection determiner configured to determine a
8 destination selected for a Mopy in a Mopy from multiple destinations on
9 the MFD;

10 a Mopy-job formatter configured to format a Mopy job that
11 includes source-selecting directions for at least one Mopy in the job and
12 destination-selecting directions for at least one Mopy in the job;

13 a Mopy-job transmitter configured to transmit the Mopy job to
14 the MFD..

15
16 6. (previously amended) A method facilitating multiple-
17 original-output ("Mopying") control of a Mopy-enabled multifunction device
18 (MFD), the method comprising:

19 specifying a source for a Mopy in a Mopy job from multiple sources on
20 the MFD;

21 specifying a destination for a Mopy in a Mopy job from multiple
22 destinations on the MFD.

1 7. 2 further comprising:

3 formatting a Mopy job, such job includes source-selecting directions for
4 at least one Mopy in the job and destination-selecting directions for at least one
5 Mopy in the job;

6 transmitting the Mopy job to the MFD.
7

8 8. (PRESENTLY AMENDED) A computer-readable medium
9 having computer-executable instructions that, when executed by a computer,
10 performs a method comprising:.

11 specifying a source for a Mopy in a Mopy job from multiple sources on
12 ~~the MFD~~ a Mopy-enabled multifunction device (MFD);

13 specifying a destination for a Mopy in a Mopy job from multiple
14 destinations on the MFD.
15

16 9. 17 ("Mopying") control system for use with a Mopy-enabled multifunction device
18 (MFD), the system comprising:

19 a source-selection specifier configured to select a source for each Mopy
20 in a Mopy job from multiple sources on the MFD;

21 a destination-selection specifier configured to select a destination for
22 each Mopy in a Mopy job from multiple destinations on the MFD.
23
24
25

1 10. (previously amended) A system as recited claim 9, further
2 comprising:

3 a Mopy-job formatter configured to format a Mopy job that includes
4 source-selecting directions for each Mopy in the job and destination-selecting
5 directions for each Mopy in the job;

6 a Mopy-job transmitter configured to transmit the Mopy job to the
7 MFD.

8
9 11. (previously amended) A Mopy-enabled multifunction
10 device comprising:

11 a printing engine;

12 multiple sources;

13 multiple destinations;

14 a receiver configured to receive a Mopy job from multiple-original-
15 output ("Mopying") control system for use with a MFD, the system
16 comprising:

17 a source-selection specifier configured to select a source for each
18 Mopy in a Mopy job from multiple sources on the MFD;

19 a destination-selection specifier configured to select a destination
20 for each Mopy in a Mopy job from multiple destinations on the MFD.
21
22
23
24
25

1 **12. (previously amended)** A printer driver comprising a
2 multiple-original-output ("Mopying") control system for use with a Mopy-
3 enabled multifunction device (MFD), the system comprising.

4 a source-selection specifier configured to select a source for each Mopy
5 in a Mopy job from multiple sources on the MFD;

6 a destination-selection specifier configured to select a destination for
7 each Mopy in a Mopy job from multiple destinations on the MFD.

8
9
10 **13. (previously amended)** An application comprising a multiple-
11 original-output ("Mopying") control system for use with a Mopy-enabled
12 multifunction device (MFD), the system comprising.

13 a source-selection specifier configured to select a source for each Mopy
14 in a Mopy job from multiple sources on the MFD;

15 a destination-selection specifier configured to select a destination for
16 each Mopy in a Mopy job from multiple destinations on the MFD.

17
18 **14. (previously amended)** An operating system comprising a
19 multiple-original-output ("Mopying") control system for use with a Mopy-
20 enabled multifunction device (MFD), the system comprising.

21 a source-selection specifier configured to select a source for each Mopy
22 in a Mopy job from multiple sources on the MFD;

23 a destination-selection specifier configured to select a destination for
24 each Mopy in a Mopy job from multiple destinations on the MFD.

25
